Inverse regression Calculator

Analyzes the data table by inverse regression and draws the chart.

Inverse regression: $y = A + \frac{B}{x}$

(input by clicking each cell in the table below)

data

No.	x	y

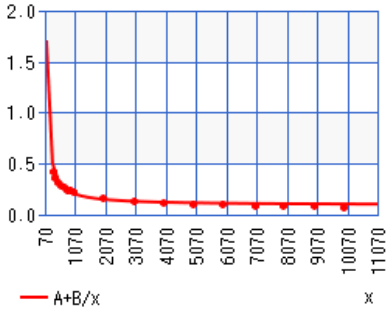
function	value
mean of x	1,052.673684
mean of y	0.2007711053
correlation coefficient r	0.988357875
A	0.0935330939
B	112.8866325



Guidelines for interpreting correlation coefficient r :

0.7<|r|≦1 strong correlation
0.4<|r|<0.7 moderate correlation
0.2<|r|<0.4 weak correlation
0≦|r|<0.2 no correlation

Inverse regression

(1) *mean*: $\overline{x^{-1}}=\frac{\sum x_i^{-1}}{n}$, $\overline{y}=\frac{\sum y_i}{n}$

(2) *trend line*: $y=A+\frac{B}{x}$, $B=\frac{Sxy}{Sxx}$, $A=\overline{y}-B\overline{x^{-1}}$

(3) *correlation coefficient*: $r=\frac{Sxy}{\sqrt{Sxx}\sqrt{Syy}}$

$$Sxx=\frac{\sum(x_i^{-1}-\overline{x^{-1}})^2}{n}=\frac{\sum(x_i^{-1})^2}{n}-\overline{x^{-1}}^2$$

$$Syy=\frac{\sum(y_i-\overline{y})^2}{n}=\frac{\sum y_i^2}{n}-\overline{y}^2$$

$$Sxy=\frac{\sum(x_i^{-1}-\overline{x^{-1}})(y_i-\overline{y})}{n}=\frac{\sum x_i^{-1}y_i}{n}-\overline{x^{-1}}\overline{y}$$
